“Innovative Structural Systems in Architecture 2021” (ISSA2021)

I would like to invite you to take part in the scientific workshop ISSA2021, organized again by our Committee, which will be held in **November 5-6, 2021**. Because of the current situation and development of COVID-19 the previously intended time of workshops has been changed from November 2020 to the current date. Participation in workshops will be possible in typical mode and/or online. Templates of the application form and abstract in Word format are available on the appropriate tab of the ISSA2021 website: <https://issawroclaw.pan.pl>

Any updates regarding ISSA2021 will be provided on the following website:

<https://issawroclaw.pan.pl>

This year's workshops are similar in subject and form to the previous three which took place in 2014, 2016 and 2018. The scientific goals refer to the innovative structural systems recently developed or applied in objects of contemporary architecture as well as in renovation of buildings considered as historic monuments. The scientific scope is also extended to the newly developed methods of architectonic or structural design proposed for shaping the bearing systems of big structural efficiency for various multi-storey buildings, including high-rise buildings, the lightweight roof structures, bridges, footbridges and systems of foldable or retractable roof covers.

Participation in ISSA2021 is free of charge. The official languages of the workshops are: English and Polish. Correspondence regarding all aspects of participation in ISSA2021 please send to the following address:

issa.conference@pan.pl

I would like to encourage you to actively get involved in ISSA2018. Accepted papers can be published in the scientific journal *Architectus*.

The deadline for sending the Application Form is 03rd October 2021.

*Prof. D.Sc. Ph.D. Arch. Janusz Rębielak
Chairman of the Committee for Architecture and Town Planning
of the Wrocław Branch of the Polish Academy of Sciences*
